SHARE Annual Report 2020-2021

Every year, the SHARE Center reports the number of contacts received through the telephone, referrals, walk-ins, and electronic communication during the academic year (July through June). By making these reports available, the SHARE Center hopes to encourage all individuals to seek services when they, or someone they know, have experienced sexual misconduct. More information about SHARE's services is available [here](#).

The following annual report captures statistics from July 2020-June 2021. Due to the COVID-19 pandemic, the SHARE Center's physical office was closed. All services were provided remotely by video/phone during this period and the 24/7 hotline continued to operate as usual. In light of these circumstances, this report is the first in SHARE's history to represent a slight decrease in the number of *initial* contacts with our center (the only data collected by SHARE, historically). At the same time, our staff experienced a change in the profile of the contacts we received with significant increases in the number of individuals staying connected to SHARE for ongoing support and for longer periods of time (including throughout breaks due to telehealth options). In response to this new trend, we partnered with colleagues in the Yale Health IT Department to develop a system to track ongoing contacts. We will begin capturing and reporting on this expanded data beginning July 2021 in hopes of providing a richer profile of the utilization of SHARE's services moving forward.
